THE 13 year old daughter of Representative Lee is on the pay roll as a clerk at \$3.50 per day. When a 13-year old girl can earn \$3.50 a day in this country the Democrats ought to stop howling about hard times.

THE Chilcoot Press hotel located on I cicle avenue has its letter heads printed with these unique charges: Rates 88 per day, sleeping room, breakfast and blankets and lunch. Hot water and bought and sold.

THE Kansas state auditor recently furnished information to the legislature showing that the Quantrell raid had cost the citizens of that state \$166,-000. The tax-payers of Missouri are far worse off than their Kansas neighbors. however, for they are now called upon to pay \$700,000 for the raid of the Stephens machine for two years in Missouri politics, and there are two more years to follow.

In connection with the subject of revision of the revenue laws of this state the question of an income tax is being strongly considered. The depleted condition of our state tressury, caused by the extravagant expenditures of the politicians in charge of our governmental machinery, causes them to cast about and consider with favor any measure just regard to the rights of the people upen whom the burden is cast.

THE religious body known as the Christian church is only about 75 years old. but its growth has been so rapid that it now numbers more than 1,000,000 com municante in this country alone. There are 160,000 disciples in Missouri alone. Last year they made a gain of not less than 50,000, and their war cry this year is again of 100,000. They have more than 10,000 churches, and about 6,000 preachers. They are building up a number of splendid educational institutions in different parts of the country.

"Roys," said a Chicago Sunday school teacher, after she had spent half an hour expatiating on the value of prayer, "suppose one of you were in some far-away city. Suppose that you were without a friend, and that you didn't have a cent in the world. Suppose you were unable to find any work or to get any money and were hungry. What would you do?' She paused and gazed at the serious faces in front of her, and felt sure that the class had profited by the lesson. Johnny Green raised his hand to reply with the utmost promptness. "I'd go to the free lunch counter," he said.

After Riden died his widow sued Grimm for damages, and the case was decided in her fayor. She further sent to him, just before Christmas, her husband's tombstone, with the message that the lettering could be altered to suit Mr. Grimm.

Of car riages the Orduance Department has provided for sixty-nine 8-inch, 118 10inch and eighty-one 12 inch, some of them being, however, still under manufacture. Then we must add 320 12 inch mortars and their carriage, with some 10-inch. Finally, we have 316 rapid-tire guns, from the 6 inch down to the 6pounder, a part of them already mounted and the rest under manufacture. We may expect to have by the end of June, 876 seacoast guns and morture.

Public Plunder for Political Purposes

[From the Post-Dispatch] Extravagance with the people's money is not confined to the House. The senate is in the same business. It is resort ing to public plunder for political purposes as energetically as the House.

The Miseries of Worry.

Worry is forethought gone to seed,

says a writer in the Philadelphia Saturday Erening Post. Worry is discounting possible future sorrows, so that the inthe traitor in our camp that dampens Doyouknow this? the guise of helping us to hear the present, and to be ready for the future. worry multiplies enemies within our mind to sap our strength. Worry is the fearful idea. The mental energy and force that should be concentrated on stantly and surreptitiously abstracted and absorbed by this one fixed idea. The working of the mind, that which produces our best success, that represents our finest activity, is tapped, led away and wasted on worry. Worry must not be confused with anxiety, though both words agree in meaning, originally, a "choking," or a "strangling," referring, of course, to the throttling effect upon individual activity. The Kind of Cattle That Pay.

In nothing is the importance of a right start were vital than in the fattening of ive stock, and particularly cattle, for market. Many elements contribute to uccess, but unless the start in right, skill and care count for but little, and arlure is stamped upon the undertaking rom the very outset; unless indeed forunate circumstances, such as a combination of high priced beef and low priced feed should intervene. It is of the greatest moment, therefore, that the feeder should select the right kind of attle for fattening. We say kind and not breed, for while there are several good beef breeds there is but one beef type, which is possessed by the several breeds in common. With some feeders a steer is a steer, and the idea that one than another does not seem to enter their heads, or if it does it is chased away by the delusive thought that the smaller cost of the inferior animal will offset any difference. Fortunately this class of feeders is small, and the vast majority well understand that the protitable steer to feed is the one bred and built for beef making, the animal that repays feed and care by putting on a thick covering of rich, ripe, juscy flesh, deep and thick in the parts from whence the high priced cuts of meat are takenand not the animal that converts the bulk of his feed into tallow and hardly puls on enough flesh to decently cover
